**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I live on market street in downtown SF and can't get fiber access because providers don't offer it in the building. Why not? I hear it's because someone owns the building wiring for our 6 story approx 200 unit building. Obviously other buildings on Market have gigabit fiber, but I can't get it in my building because of some barriers to competition. I want open competition and more providers in my building for me, not just for whoever payed off the building manager and made a contract with some business for profit at my expense and inconveniences.

I use sonic for my current internet and would like it if they were allowed to offer us gigabit fiber in my building.
